Thin Solid Films 293 (1997) 337–341

thin solid films

Subject Index of Volume 293

Absorption
electric field dependence of optical absorption in UV and visible region in PVA film, 270
Adhesion
mechanical properties of r.f. magnetron sputtered indium tin oxide films, 244
formation and adhesion of hot filament CVD diamond films on titanium substrates, 261
Adsorption
the effects of detected gases on spectroscopic properties of phthalocyanine Langmuir–Blodgett films, 277
Aluminium
film thickness variation in a cylindrical magnetron deposition device, 78
effects of r.f. bias and nitrogen flow rates on the reactive sputtering of TiAlN films, 212
copper enrichment in Al–Cu alloys due to electropolishing and anodic oxidation, 327
Amorphous
Young's modulus of RF-sputtered amorphous thin films in the SiO_2–Y_2O_3 system at high temperature, 144
Amorphous materials
Er-doping effects on properties of amorphous silicon films prepared by electron beam evaporations, 63
deposition of unhydrogenated diamond-like amorphous carbon films by electrolysis of organic solutions, 87
surface and bulk properties of electron beam evaporated carbon films, 96
relation between mechanical and structural properties of silicon-incorporated hard a-C:H films, 206
structure and mechanical properties of hard amorphous carbon–nitrogen films obtained by plasma decomposition of methane–ammonia mixtures, 236
electrical and optical properties of thermally evaporated thin films of $(As_2S_3)_{1-x}(PbS)_x$, 303
Anodic oxidation
copper enrichment in Al–Cu alloys due to electropolishing and anodic oxidation, 327
Atomic force microscopy
synthesis and characterization of nanosized titanium oxide films on the (0001) α-Al_2O_3 surface, 91
quasiatomically flat surfaces of CdTe growth by evaporation technique, 149
analysis of the dynamic organization of mixed protein/fatty acid Langmuir films, 295

Band structure
P–d hybridization of the valence bands in chalcopyrite laser-deposited Cu(In, Ga)Se_2 thin films, 75
Biomaterials
photoinduced transformation of wild-type and D96N-mutant 4-keto-bacteriorhodopsin gelatin films, 281

Bond coat
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Boron nitride
on thermodynamic equilibria of solid BN and gas phases in the B–N–H–Cl–He system, 11
phase evolution in boron nitride thin films prepared by a dc-gasdischarge assisted pulsed laser deposition, 17

Cadmium sulphide
preparation and characterization of CdS/CdTe thin film solar cells, 272
Cadmium telluride
quasiatomically flat surfaces of CdTe growth by evaporation technique, 149
rapid thermal annealing effects in CdTe (111) thin films grown on Si (100) substrates by molecular beam epitaxy, 196
preparation and characterization of CdS/CdTe thin film solar cells, 272
Carbides
chemical vapour deposition of molybdenum carbides using C_{60} as a carbon source, 133
Carbon
deposition of unhydrogenated diamond-like amorphous carbon films by electrolysis of organic solutions, 87
surface and bulk properties of electron beam evaporated carbon films, 96
relation between mechanical and structural properties of silicon-incorporated hard a-C:H films, 206
Ceramics
structural changes in plasma-sprayed ZrO_2 coatings after hot isostatic pressing, 227
Chemical vapour deposition
p- and n-type $CuInSe_2$ thin films grown by close-spaced vapour transport, 45
formation of high-quality silicon dioxide films by electron cyclotron resonance plasma oxidation and plasma-enhanced chemical vapour deposition, 52
chemical vapour deposition of molybdenum carbides using C_{60} as a carbon source, 133
formation and adhesion of hot filament CVD diamond films on titanium substrates, 261
Chemical vapour deposition (CVD)
the mechanism of dehydrogenation of SiN_x:H films, 6
on thermodynamic equilibria of solid BN and gas phases in the B–N–H–Cl–He system, 11
CO_2 laser
nitriding of titanium under CW CO_2 laser radiation, 220
Coating
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Coatings
sol–gel-prepared ITO films for electrochromic systems, 108

Elsevier Science S.A.

elaboration and characterization of titania coatings, 163
structural changes in plasma-sprayed ZrO_2 coatings after hot isostatic pressing, 227
Computer simulation
on thermodynamic equilibria of solid BN and gas phases in the B–N–H–Cl–He system, 11
Condensed matter film behaviour
copper enrichment in Al–Cu alloys due to electropolishing and anodic oxidation, 327
Conductivity
a novel lithium conductor prepared by unbalanced magnetron r.f. sputtering, 175
effective conductivity of chemically deposited ZnO thin films, 320
Contact damage
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Contacts
electronic properties of junctions between aluminum and doped poly(3,4-ethylenedioxythiophene), 138
Copper
film thickness variation in a cylindrical magnetron deposition device, 78
Corrosion
variations of properties of the MoS_2–LaF_3 cosputtered and MoS_2-sputtered films after storage in moist air, 1

Dc-gasdischarge
phase evolution in boron nitride thin films prepared by a dc-gasdischarge assisted pulsed laser deposition, 17
Delamination
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Deposition process
chemical gas-phase reactions for a-Si:H and μc-Si:H deposition, 83
sol–gel-prepared ITO films for electrochromic systems, 108
experimental and theoretical studies of coating thickness distributions obtained from high rate electron beam evaporation sources, 124
structural study on the alternating Langmuir–Blodgett films deposited with two complementary barbituric acid and melamine derivatives, 170
Diamond
formation and adhesion of hot filament CVD diamond films on titanium substrates, 261
Diffusion
nitriding of titanium under CW CO_2 laser radiation, 220
Displacement current
maxwell displacement current due to phase transitions in liquid crystals on a water surface, 299

Electrical properties and measurements
sol–gel-prepared ITO films for electrochromic systems, 108
electronic properties of junctions between aluminum and doped poly(3,4-ethylenedioxythiophene), 138
preparation and characterization of CdS/CdTe thin film solar cells, 272
electrical and optical properties of thermally evaporated thin films of $(As_2S_3)_{1-x}(PbS)_x$, 303
Electrochemistry
K^+ sensors based on supported alkanethiol/phospholipid bilayers, 153
electrochemical study of the interfacial characteristics of redox-active viologen thiol self-assembled monolayers, 200
Electron beams
Er-doping effects on properties of amorphous silicon films prepared by electron beam evaporations, 63
Electron stimulated desorption
deposition of unhydrogenated diamond-like amorphous carbon films by electrolysis of organic solutions, 87
Electron transfer
electrochemical study of the interfacial characteristics of redox-active viologen thiol self-assembled monolayers, 200
Ellipsometry
formation of high-quality silicon dioxide films by electron cyclotron resonance plasma oxidation and plasma-enhanced chemical vapour deposition, 52
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 179
Epitaxy
the effect of growth temperature on electrical conductivity and on the structure of thin refractory metal films, grown by laser ablation deposition, 315
Evaporation
Er-doping effects on properties of amorphous silicon films prepared by electron beam evaporations, 63
surface and bulk properties of electron beam evaporated carbon films, 96
experimental and theoretical studies of coating thickness distributions obtained from high rate electron beam evaporation sources, 124

Fatty acid
structural characterisation of sodium behenate Langmuir–Blodgett films using X-ray diffraction techniques, 291
Field effect
electric field dependence of optical absorption in UV and visible region in PVA film, 270
Fourier transform infrared spectroscopy
phase evolution in boron nitride thin films prepared by a dc-gasdischarge assisted pulsed laser deposition, 17
real-time in-situ observation of PVD of *N*-vinylcarbazole with FTIR-RAS, 113
observing the breathing of silica sol–gel-derived anti-reflection optical coatings, 185
analysis of the dynamic organization of mixed protein/fatty acid Langmuir films, 295

Grazing incidence X-ray diffraction
structural characterisation of sodium behenate Langmuir–Blodgett films using X-ray diffraction techniques, 291
Growth mechanism
yttria-stabilized zirconia thin films grown by r.f. magnetron sputtering from an oxide target, 67
synthesis and characterization of nanosized titanium oxide films on the (0001) α-Al_2O_3 surface, 91
quasiatomically flat surfaces of CdTe growth by evaporation technique, 149
investigation on solid phase epitaxy of deposited SiGe film on a Si substrate, 310

Hard carbon
structure and mechanical properties of hard amorphous carbon–nitrogen films obtained by plasma decomposition of methane–ammonia mixtures, 236
Hardness
mechanical properties of r.f. magnetron sputtered indium tin oxide films, 244
Heat treatment
nitriding of titanium under CW CO_2 laser radiation, 220
Hydrogen
chemical gas-phase reactions for a-Si:H and μc-Si:H deposition, 83

Indentation stress–strain curve
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Indium
characterization of indium-doped zinc oxide films deposited by pyrolytic spray with different indium compounds as dopants, 117

Indium oxide
mechanical properties of r.f. magnetron sputtered indium tin oxide films, 244
Infrared spectroscopy
the mechanism of dehydrogenation of SiN_x:H films, 6
Interfaces
electrochemical study of the interfacial characteristics of redox-active viologen thiol self-assembled monolayers, 200
analysis of the dynamic organization of mixed protein/fatty acid Langmuir films, 295
Iron
the investigation of Fe–Si alloys synthesized by laser irradiation, 29
Iron oxide
$CuFe_2O_4$ thin films: elaboration process, microstructural and magneto-optical properties, 22

Kinetic
nitriding of titanium under CW CO_2 laser radiation, 220

Langmuir–Blodgett films
K^+ sensors based on supported alkanethiol/phospholipid bilayers, 153
photoconductivity of Langmuir–Blodgett films of corbathiene, 159
structural study on the alternating Langmuir–Blodgett films deposited with two complementary barbituric acid and melamine derivatives, 170
the effects of detected gases on spectroscopic properties of phthalocyanine Langmuir–Blodgett films, 277
the study of correlation between the dye molecule behaviour in monolayers and their spectral properties in Langmuir–Blodgett films, 285
structural characterisation of sodium behenate Langmuir–Blodgett films using X-ray diffraction techniques, 291
analysis of the dynamic organization of mixed protein/fatty acid Langmuir films, 295
Laser ablation
phase evolution in boron nitride thin films prepared by a dc-gasdischarge assisted pulsed laser deposition, 17
the effect of growth temperature on electrical conductivity and on the structure of thin refractory metal films, grown by laser ablation deposition, 315
Laser deposition
P–d hybridization of the valence bands in chalcopyrite laser-deposited Cu(In, Ga)Se_2 thin films, 75
Laser irradiation
the investigation of Fe–Si alloys synthesized by laser irradiation, 29
nitriding of titanium under CW CO_2 laser radiation, 220
Liquid crystal
maxwell displacement current due to phase transitions in liquid crystals on a water surface, 299
Lithium
a novel lithium conductor prepared by unbalanced magnetron r.f. sputtering, 175
Luminescence
photoluminescent characteristics of lithium-doped zinc oxide films deposited by spray pyrolysis, 103

Magnetic properties and measurements
the investigation of Fe–Si alloys synthesized by laser irradiation, 29
Metals
experimental and theoretical studies of coating thickness distributions obtained from high rate electron beam evaporation sources, 124
electronic properties of junctions between aluminum and doped poly(3,4-ethylenedioxythiophene), 138
Molecular beam epitaxy
rapid thermal annealing effects in CdTe (111) thin films grown on Si (100) substrates by molecular beam epitaxy, 196
Monolayers
electrochemical study of the interfacial characteristics of redox-active viologen thiol self-assembled monolayers, 200
the study of correlation between the dye molecule behaviour in monolayers and their spectral properties in Langmuir–Blodgett films, 285
maxwell displacement current due to phase transitions in liquid crystals on a water surface, 299
Mossbauer spectroscopy
the investigation of Fe–Si alloys synthesized by laser irradiation, 29
Multilayers
photoconductivity of Langmuir–Blodgett films of corbathiene, 159
the study of correlation between the dye molecule behaviour in monolayers and their spectral properties in Langmuir–Blodgett films, 285

Niobium
a novel lithium conductor prepared by unbalanced magnetron r.f. sputtering, 175
the effect of growth temperature on electrical conductivity and on the structure of thin refractory metal films, grown by laser ablation deposition, 315
Nitrides
structure and mechanical properties of hard amorphous carbon–nitrogen films obtained by plasma decomposition of methane–ammonia mixtures, 236
Nitrogen
a novel lithium conductor prepared by unbalanced magnetron r.f. sputtering, 175
effects of r.f. bias and nitrogen flow rates on the reactive sputtering of TiAlN films, 212

Optical coatings
observing the breathing of silica sol–gel-derived anti-reflection optical coatings, 185
Optical properties
P–d hybridization of the valence bands in chalcopyrite laser-deposited Cu(In, Ga)Se_2 thin films, 75
sol–gel-prepared ITO films for electrochromic systems, 108
elaboration and characterization of titania coatings, 163
observing the breathing of silica sol–gel-derived anti-reflection optical coatings, 185
rapid thermal annealing effects in CdTe (111) thin films grown on Si (100) substrates by molecular beam epitaxy, 196
electric field dependence of optical absorption in UV and visible region in PVA film, 270
the effects of detected gases on spectroscopic properties of phthalocyanine Langmuir–Blodgett films, 277
the study of correlation between the dye molecule behaviour in monolayers and their spectral properties in Langmuir–Blodgett films, 285
electrical and optical properties of thermally evaporated thin films of $(As_2S_3)_{1-x}(PbS)_x$, 303
Optical spectroscopy
photoinduced transformation of wild-type and D96N-mutant 4-keto-bacteriorhodopsin gelatin films, 281
the study of correlation between the dye molecule behaviour in monolayers and their spectral properties in Langmuir–Blodgett films, 285
Organic substances
real-time in-situ observation of PVD of *N*-vinylcarbazole with FTIR-RAS, 113
Orientation
real-time in-situ observation of PVD of *N*-vinylcarbazole with FTIR-RAS, 113

Oxidation
variations of properties of the MoS_2–LaF_3 cosputtered and MoS_2-sputtered films after storage in moist air, 1
Oxides
$CuFe_2O_4$ thin films: elaboration process, microstructural and magneto-optical properties, 22
yttria-stabilized zirconia thin films grown by r.f. magnetron sputtering from an oxide target, 67

Phase transition
maxwell displacement current due to phase transitions in liquid crystals on a water surface, 299
Photoconductivity
photoconductivity of Langmuir–Blodgett films of corbathiene, 159
Photoluminescence
photoluminescent characteristics of lithium-doped zinc oxide films deposited by spray pyrolysis, 103
rapid thermal annealing effects in CdTe (111) thin films grown on Si (100) substrates by molecular beam epitaxy, 196
Photovoltaic characterization
surface photovoltaic characterizations of porous silicon layers, 40
Physical vapour deposition (PVD)
real-time in-situ observation of PVD of *N*-vinylcarbazole with FTIR-RAS, 113
experimental and theoretical studies of coating thickness distributions obtained from high rate electron beam evaporation sources, 124
Plasma processing and deposition
the mechanism of dehydrogenation of SiN_x:H films, 6
$CuFe_2O_4$ thin films: elaboration process, microstructural and magneto-optical properties, 22
formation of high-quality silicon dioxide films by electron cyclotron resonance plasma oxidation and plasma-enhanced chemical vapour deposition, 52
film thickness variation in a cylindrical magnetron deposition device, 78
structural changes in plasma-sprayed ZrO_2 coatings after hot isostatic pressing, 227
structure and mechanical properties of hard amorphous carbon–nitrogen films obtained by plasma decomposition of methane–ammonia mixtures, 236
Plasticity
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Platinum
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 179
Polycrystalline silicon
morphological stability of $TiSi_2$ on polycrystalline silicon, 34
Polymers
electric field dependence of optical absorption in UV and visible region in PVA film, 270
Porous silicon
surface photovoltaic characterizations of porous silicon layers, 40
Potassium
K^+ sensors based on supported alkanethiol/phospholipid bilayers, 153
Pyrolysis
photoluminescent characteristics of lithium-doped zinc oxide films deposited by spray pyrolysis, 103
characterization of indium-doped zinc oxide films deposited by pyrolytic spray with different indium compounds as dopants, 117

Raman scattering
deposition of unhydrogenated diamond-like amorphous carbon films by electrolysis of organic solutions, 87
Resistance
morphological stability of $TiSi_2$ on polycrystalline silicon, 34
Rutherford backscattering spectroscopy
copper enrichment in Al–Cu alloys due to electropolishing and anodic oxidation, 327

Scanning electron microscopy
p- and n-type $CuInSe_2$ thin films grown by close-spaced vapour transport, 45
Selenides
p- and n-type $CuInSe_2$ thin films grown by close-spaced vapour transport, 45
Semiconductors
electrical and optical properties of thermally evaporated thin films of $(As_2S_3)_{1-x}(PbS)_x$, 303
Sensors
K^+ sensors based on supported alkanethiol/phospholipid bilayers, 153
the effects of detected gases on spectroscopic properties of phthalocyanine Langmuir–Blodgett films, 277
Silicon
the investigation of Fe–Si alloys synthesized by laser irradiation, 29
Er-doping effects on properties of amorphous silicon films prepared by electron beam evaporations, 63
chemical gas-phase reactions for a-Si:H and μc-Si:H deposition, 83
Silicon carbide
relation between mechanical and structural properties of silicon-incorporated hard a-C:H films, 206
Silicon nitride
the mechanism of dehydrogenation of SiN_x:H films, 6
Silicon oxide
formation of high-quality silicon dioxide films by electron cyclotron resonance plasma oxidation and plasma-enhanced chemical vapour deposition, 52
observing the breathing of silica sol–gel-derived anti-reflection optical coatings, 185
Sodium behenate
structural characterisation of sodium behenate Langmuir–Blodgett films using X-ray diffraction techniques, 291
Solar cells
P–d hybridization of the valence bands in chalcopyrite laser-deposited $Cu(In, Ga)Se_2$ thin films, 75
preparation and characterization of CdS/CdTe thin film solar cells, 272
Solid phase epitaxy
investigation on solid phase epitaxy of deposited SiGe film on a Si substrate, 310
Sputtered film
Young's modulus of RF-sputtered amorphous thin films in the SiO_2–Y_2O_3 system at high temperature, 144
Sputtering
yttria-stabilized zirconia thin films grown by r.f. magnetron sputtering from an oxide target, 67
film thickness variation in a cylindrical magnetron deposition device, 78
elaboration and characterization of titania coatings, 163
a novel lithium conductor prepared by unbalanced magnetron r.f. sputtering, 175
effects of r.f. bias and nitrogen flow rates on the reactive sputtering of TiAlN films, 212
mechanical properties of r.f. magnetron sputtered indium tin oxide films, 244
investigation on solid phase epitaxy of deposited SiGe film on a Si substrate, 310
Stability
morphological stability of $TiSi_2$ on polycrystalline silicon, 34
Structural properties
structural study on the alternating Langmuir–Blodgett films deposited

with two complementary barbituric acid and melamine derivatives, 170
relation between mechanical and structural properties of silicon-incorporated hard a-C:H films, 206
investigation on solid phase epitaxy of deposited SiGe film on a Si substrate, 310
Substrates
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Surface and interface states
surface and bulk properties of electron beam evaporated carbon films, 96
Surface roughness
quasiatomically flat surfaces of CdTe growth by evaporation technique, 149
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 179
Surface structure
variations of properties of the MoS_2–LaF_3 cosputtered and MoS_2-sputtered films after storage in moist air, 1
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 179
Surface treatment
nitriding of titanium under CW CO_2 laser radiation, 220

Thermal spray coatings
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
Titanium
morphological stability of $TiSi_2$ on polycrystalline silicon, 34
effects of r.f. bias and nitrogen flow rates on the reactive sputtering of TiAlN films, 212
nitriding of titanium under CW CO_2 laser radiation, 220
formation and adhesion of hot filament CVD diamond films on titanium substrates, 261
Titanium dioxide
synthesis and characterization of nanosized titanium oxide films on the (0001) α-Al_2O_3 surface, 91
Titanium nitride
nitriding of titanium under CW CO_2 laser radiation, 220
Titanium oxide
elaboration and characterization of titania coatings, 163
Transmission electron microscopy
copper enrichment in Al–Cu alloys due to electropolishing and anodic oxidation, 327
Tribology
variations of properties of the MoS_2–LaF_3 cosputtered and MoS_2-sputtered films after storage in moist air, 1
Tungsten
the effect of growth temperature on electrical conductivity and on the structure of thin refractory metal films, grown by laser ablation deposition, 315

X-ray diffraction
p- and n-type $CuInSe_2$ thin films grown by close-spaced vapour transport, 45
X-ray specular reflectivity
structural characterisation of sodium behenate Langmuir–Blodgett films using X-ray diffraction techniques, 291

Young's modulus
Young's modulus of RF-sputtered amorphous thin films in the SiO_2–Y_2O_3 system at high temperature, 144

Zinc oxide
photoluminescent characteristics of lithium-doped zinc oxide films deposited by spray pyrolysis, 103
characterization of indium-doped zinc oxide films deposited by pyrolytic spray with different indium compounds as dopants, 117
effective conductivity of chemically deposited ZnO thin films, 320
Zirconia
effect of substrate and bond coat on contact damage in zirconia-based plasma-sprayed coatings, 251
